JAVASCRIPT FULL STACK DEVELOPER

OBJECTIVE

To work in a creative, innovative and challenging environment and to help the organization to achieve its objective in a most efficient manner by applying my skills and abilities and thereby to grow with the organization.

PROFESSIONAL EXPERIENCE

FULL-STACK (JAVASCRIPT) DEVELOPER

Geek Informatic & Technologies Pvt Ltd, Mohali chandigarh

MAY 2022 – PRESENT

- ◆ **VEHICLE TRANSPORT SERVICE APPLICATION (JOA):** DEVELOPED A WEB APPLICATION USING THE MEAN STACK, OPTIMIZING USER EXPERIENCE FOR VEHICLE TRANSPORT SERVICES.
- ◆ **RAVEL APPLICATION:** DESIGNED AND IMPLEMENTED LOGIN AND REGISTRATION MODULES. CREATED DASHBOARDS FOR MANAGING POSTS IN JOB AND REAL ESTATE CATEGORIES USING THE MEAN STACK.
- ◆ **Admin Dashboard for Pcard.pro:**
 - Built a dashboard to list profiles with categories using the MERN stack.
 - Developed functionality for user account creation with OTP-based multi-step registration.
 - Stored user posts in AWS S3 and hosted the application on AWS EC2 for enhanced scalability.
- ◆ **CheckTess.com Application:**
 - developed functionality to set alerts for Disneyland and designed pages showcasing Disneyland using Vue.js.
 - Managed alert systems and streamlined UX effectively.
- ◆ **D2G (<https://d2g.meos.pro/login>):**
 - Implemented an **onboarding feature** using JotForm for streamlined user registration and setup.
 - Developed the frontend using **React** with **Redux Thunk** for asynchronous actions and **Redux Persist** for state persistence.

- Built a **ChatHub-like platform** with private and group chat capabilities, similar to Slack, enabling real-time communication between team members and coaches. Leveraged WebSockets for efficient messaging and notifications.
- Enhanced the platform for seamless user experience in managing team collaboration and coaching sessions.

◆ **Social Media Web Application (Changer.io):**

- Designed and integrated APIs to improve functionality and user experience.
- Utilized **WebSockets** for implementing real-time chat features and notification events, enhancing user interaction and engagement.

◆ **Ordo:**

- worked extensively on the Ordo project using **Vue.js** to deliver a seamless user interface.
- Implemented an efficient "Add to Cart" functionality for improved user shopping experience.
- Developed robust product filtering and search capabilities to enhance usability and speed up product discovery.
- Managed application state using **Vuex**, ensuring a smooth and responsive experience for cart operations and product management.

◆ **Medi Plus:**

- Developed MediPlus, an application focused on managing course books, completed courses, and average read books, providing users with an efficient way to track their learning progress
- Designed and implemented the backend using GraphQL, ensuring seamless data querying and manipulation for advanced analytics and user insights.
- Integrated Stripe payment gateway for instant payments, subscription-based paid courses, and support for subscription cancellations.
 - Implemented secure payment workflows for course purchases and recurring payments.
 - Developed subscription management features, including automated notifications for renewals and cancellations.
- Collaborated with the frontend team to provide intuitive user interfaces for course tracking and payment management

◆ **AWS Configuration:**

- Configured S3, CloudFront, MediaConvert, and AWS Cognito to optimize applications for speed and scalability, reducing page load time and boosting traffic.

◆ **API Development:**

- Created and maintained RESTful APIs using GraphQL, enabling seamless communication between web applications and third-party services.

◆ **Chrome Extension:**

- Developed an extension using Vue.js and Chrome Service Worker to scrape images, videos, and text from websites.

◆ **Third-Party API Integration:**

- Integrated third-party APIs into web applications, enhancing functionality and improving user satisfaction.

◆ **Dashboard Application:**

- Designed and developed a React-based dashboard to manage scraped records, resulting in increased user engagement.

TECHNICAL SKILLS

- | | |
|---|-----------------|
| ● REACT | ● Redux |
| ● JAVASCRIPT | ● Redux Thunk |
| ● TYPE SCRIPT | ● Redux Persist |
| ● ANGULAR | ● RTK |
| ● CSS3 | ● NODE |
| ● CSS | ● GRAPH QL |
| ● BOOTSTRAP | ● WEBSOCKET |
| ● EXPRESS | ● VUE JS |
| ● FIREBASE | ● REDUX |
| ● WEB SOCKET | ● RTK |
| ● AWS ,EC2,S3,CLODFRONT,Aws Cognito | ● MONGODB |
| ● Firebase, RESTful APIs, Chrome Extensions | ● SQL |

EDUCATION

- Masters of computer Application from GRAPHIC ERA HILL UNIVERSITY 2018-2021
- Bachelors of science from H.N.B Garhwal University :2014- 2017
- Intermediate from Uttarakhand Board :2014
- High School from Uttarakhand Board :2012

PROJECTS

- **PCard.pro**: Profile listing and management dashboard with client-side account creation and AWS integration.
- **CheckTess.com**: Alert-based application showcasing Disneyland restaurants, leveraging Vue.js.
- **D2G**: Onboarding platform integrated with JotForm and developed using **React**, **Redux Thunk**, and **Redux Persist**. Features a ChatHub-like real-time communication system for private and group chats using WebSockets.
- **Mediplus**: Course management platform with features for course books, completed courses, and average read books. Backend built with **GraphQL**, and **Stripe Payment Gateway** integrated for instant payments, subscription management, and cancelation
- **Ordo Project**: E-commerce platform developed with **Vue.js**. Features include "Add to Cart", product filtering, and search functionality, with state management handled by **Vuex**.
- **Changer.io**: Social media web application featuring real-time chat and notification functionality using WebSockets, APIs, and optimized AWS configurations.
- **Custom Chrome Extension**: Web scraping tool for extracting images, videos, and text from websites.
- **MEOS**: Docker based onboarding system Developed in MERN Stack having multiple form feature using jotform and chat feature
